

## Dog Chew Toys and Treat Dispensing Toys

All dogs need to chew! A great way to teach your dog not to chew furniture is to teach him how great it is to chew and play with his own toys. The best-loved toys have food in them or on them! Treat dispensing toys get him moving while chew toys or stuff-able toys are ideal for time in the crate. *Always supervise your pet with new toys to make sure that he cannot break them and potentially choke.*
